

2023 TRADE-BACK POLICY

Trade backs will be up to 80% of the original purchase price from the original customer to whom the instrument was sold toward the purchase of another instrument owned by us, which is of higher value, minus any costs necessary to return your instrument to a sellable condition. Credit will not exceed 50% of the cost for the instrument you would like to purchase.

We always deduct from the value of traded instruments for cracks, scratches and other damage; in serious cases, devaluation is necessary. **Note:** excessive scratches take a great deal of time to retouch and can be costly.

For instruments with serious damage, we reserve the right to decline a trade back.

An evaluation of the instrument to be traded is recommended if you have concerns regarding devaluation.

Consignment instruments purchased from us can be reconsigned or a percentage toward upgrade will be considered on a case by case basis.

Bow trade back value is 60% maximum, minus any costs necessary to return the bow to sellable condition.

We do not give trade back credit on entry level wood or fiberglass bows.

Our trade- back policy may be changed at any time.
